📖 **Questions.md**

Product Perspective

- Android | Webapp

  - For Android:

    - Extend existing project?
      - Overview of the project.
      - Direction they wish for said project.
    - Non existing proj?
      - Overview of their ideas.

  - For WebApp:

    - Existing Project?
      - Direction | goal
    - Non existing proj?
      - Ideas and thoughts.

- System Interfaces:

  - User Interfaces

    - Android:

      - Touch to navigate
      - Touch to manage input
      - Keyboard to manage values.

    - Webapp:

      - Website
      - Mouse navigation
      - Keyboard input

  - Hardware Interfaces

    - Android App:
      - Bluetooth
      - Internet
      - Device/Sensors
    - Webapp:
      - Internet
      - Device/Sensors somehow

  - Software Interfaces

    - Specific products
      - dbms
      - OS

- Memory Constrains

  - Ram
  - Disk

- Site adaptation

  - Docker, *travisCI*.

- - Software required for installation.

- User characteristics

  - End users?
  - Different user catagories w/ diff functionality

- World Constraints:

  - Hardware limits?
  - Has External Api?
  - Security requirements.
  - Privacy requirements.

- Functionality to be added later.

- Product features

  - Repeat for each:
    - Purpose
    - Full definition of each feature
      - Input
      - Output

- User constraints

  - Total users
  - Max users at given time
  - Concurrent users

- Time availability

- Process limits

  - Expected worst case

- Language for the document

  - Greek
  - English

- Stateholders

- Data Relationships

  - Entities
    - Attributes
  - Relationships
  - Admin?
  - Transactions

- Data processing requirements:

  - Aggregated
  - Realtime
